

# Benefect® DECON 30...

**One Step Disinfectant Cleaner  
Cleans & Sanitizes in 30 Seconds!  
Carpet Spray & Deodorizer  
75% Lighter Scent**

Decon 30 is the latest evolution in authentically botanical antimicrobial technology from the creators of Benefect Disinfectant. Decon 30 utilizes our same proprietary Thyme Oil Active Ingredient which revolutionized the antimicrobial industry, but features a unique, Optimized Dynamic Chemistry (ODC) surfactant system that boosts cleaning performance while still achieving hospital level disinfection - all with 75% less thyme oil! As a result Decon 30 has a very light, fast-dissipating fragrance. This ODC system also improves penetration into porous surfaces like carpet or wood and enhances mould killing and mildew prevention!

## Fast and Effective Decontamination

Decon 30 also cleans and sanitizes in just 30 seconds, making it ideal for general janitorial cleaning applications and for fast decontamination of equipment, PPE and even vertical surfaces like wood studs or concrete walls. Now contractors can save time and money by using Decon 30 to clean and disinfect in one easy step!

**Safely and effectively tackle more jobs with the comfort and confidence that comes from using Benefect products.**

**Applications:** Ideal for cleaning, decontaminating and deodorizing household contents including furniture, children's toys, pet areas, food contact surfaces and carpet in residential and commercial buildings, food service, medical facilities, schools and government buildings.

### Safer, Non-Toxic Products that Work

Benefect uses only authentically botanical ingredients, no synthetic derivatives, petrochemicals or solvents because we believe natural processes always prove to be the best design. Today we are even seeing antimicrobial resistance to quaternary ammonia disinfectants, whereas thyme oil has been killing germs effectively for thousands of years. Thyme Oil is the only active ingredient for disinfectants that is classified internationally as a Minimal Risk Active Ingredient with no known risk to humans or the environment. Why would you use anything else?

Use Xactimate's Code for Botanical Germicide: WTR>GRMB

### FEATURES

### BENEFITS

### VERIFICATION

Government Registered Disinfectant	All label claims are approved by Health Canada. Proven to kill over 99.99% of Health Canada's test microorganisms for claims of hospital disinfectant effectiveness.	Health Canada D.I.N. 02415046
Antimicrobial Efficacy	Hospital Disinfectant, Bactericide, Virucide*, Fungicide, Mildewstat: Kills over 99.99% of: Bacteria (Gram +ve & -ve): Pseudomonas, Salmonella, Staphylococcus, MRSA, E. coli O157 Mould/Mildew/Spores: Trichophyton, Aspergillus, Candida Viruses: Flu A, H1N1, Avian Flu, Rhinovirus, HIV Other odour-causing microorganisms. Not susceptible to antimicrobial resistant-bacteria.	Health Canada Product Label
No Rinse or Wipe Required	On food contact surfaces & children's toys. No harmful residue that must be removed. Save an entire labour step - save money & finish jobs faster. Reduce your liability. No PPE required.	Health Canada Product Label MSDS CFIA S432
Unprecedented Toxicity Rating	Uses Thyme Oil: The ONLY Minimum Risk Pesticide Active Ingredient. LD50 (Oral, Rat) of >14,000 mg/kg (less toxic than vinegar). EPA Category IV Toxicity for all routes of exposure: inhalation, dermal, eye & ingestion (lowest toxicity rating allowed by law). Ingredients listed as Generally Recognized As Safe (G.R.A.S.) or as Direct Food Additives by the FDA. Non-hazardous by OSHA/WHMIS criteria. Non-flammable, non-corrosive, non-reactive, mildly anionic.	Health Canada Product Label MSDS EPA's List 25(b) Toxicity & Chemical Analysis FDA GRAS & Food Additives List
No Warnings on the Label and No PPE Required	Reduced liability. The only Authentically Botanical Disinfectant in North America. No warnings, signal words, first aid, precautionary statements, special handling or PPE requirements listed on the label. The sensible choice for employees & clients.	Health Canada Product Label MSDS
Ready to Use Formula	Consistent efficacy performance, every time. No mixing hassles or complex dilution instructions. No health concerns due to inaccurate mixing. No water hardness testing required for product performance. No temperature restrictions - freeze - thaw stable. Foggable & Foamable	Health Canada Product Label
Ecological Data	Environmentally Certified - Readily Biodegradable & No Aquatic Toxicity Made from botanical essential oils. No synthetic fragrances, dyes, ammonia or chlorine or endocrine disruptors. No petrochemicals or petroleum derivatives, phthalates, DEA, ethylene oxide or 1,4-dioxane. No volatile solvents or V.O.C.s (volatile organic compounds)	Ecologo CCD-166 Patented Worldwide Test Method:EPS 1/RM/24 Testing Guideline:OECD 301D
Excellent Marketability	Ideal product for use in LEED certified buildings. Preferred disinfectant for ANY green cleaning program. Differentiate your business as the environmentally-friendly professional.	

HMIS Hazard Ratings	
HEALTH	0
FLAMMABILITY	0
REACTIVITY	0
