

## PORTABLE HEPA AIR CLEANER WITH ULTRAVIOLET LIGHT & PHOTO CATALYTIC FILTER ON WHEELS

### Description

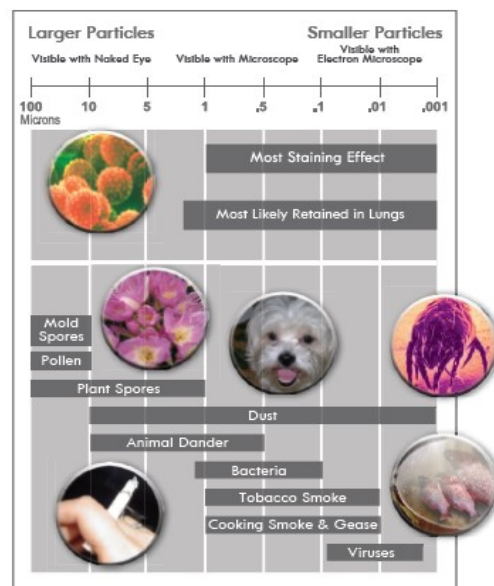

- The Evolution Air 5-in-1 Portable HEPA Air Cleaner offers the ultimate in air filtration and sterilization. This patent-pending combination uses HEPA, UVC Germicidal Light (non ozone producing) and Photo Catalytic Oxidation. It removes and destroys allergens, lung damaging atmospheric dust, biological and chemical contaminants and odors, such as toluene, benzene, cooking odors, tobacco & cannabis smoke and odors, bacteria, viruses, mold and lots more.
- Ideal for commercial applications such as dental, medical, chiropractic, optometry, massage therapy, physiotherapy and laser/ Botox clinics, along with hair/ nail/ beauty salons, health and relaxation spas, classrooms, daycare centers, retail stores, reception areas, offices and lots more.

### Standard Features

- Carbon Prefilter protects the HEPA filter while removing lint, hair and larger particles.
- Long-life, 99.97% HEPA Media Filter removes particles 0.3 micron (1/84,000 of an inch) and larger such as atmospheric and household dust, coal dust, insecticide dust, mites, pollen, mold spores, fungi, bacteria, viruses, pet dander, cooking smoke and grease, tobacco and cannabis smoke particles and more. The HEPA filter becomes more efficient as it becomes dirtier with time.
- Two UVC Germicidal Lights are enclosed in a Reflector which intensifies the UV rays.
- Unique CinQuartz® Photo Catalytic Oxidation Filter (PCO) has a very high surface exchange capability and allows UV light into the mass of the material — means there is absorption throughout the whole CinQuartz filter instead of just on the surface. The combination of the UVC light and the CinQuartz® decomposes organic materials into basic molecules such as H<sub>2</sub>O and CO<sub>2</sub>.
- Carbon/ Potassium Permanganate Final Filter for removal of Volatile Organic Compounds (VOC's) and light gases.
- Powerful energy efficient, variable speed European motor delivers up to 250 CFM of pure air.
- Plug-in Power Cord provides convenient electrical connection.
- Castors allow easy maneuvering from room to room.

### POLLUTION CHART

### Cabinet Construction

- Sleek looks that are aesthetically pleasing, blend nicely with any decor. TGIC environmentally-friendly, powder coat paint finish.

### Limited 5 Year Warranty

## SPECIFICATIONS

MODEL	EVP900	
<b>Air Flow: Variable Speed Control</b>	Up to 250 cfm	Up to 425 m³/hr
<b>Carbon Prefilter: DM900-0855</b> Removes lint and large particles	Replace every 3-6 months	
<b>Long-Life, 99.97% HEPA Media: DMH4-0400</b> Removes pollutants 0.3 micron	40 ft² Replace every 2-4 years	3.7 m² Replace every 2-4 years
<b>Germicidal UVC Light: DM900-0191</b> Strongest light intensity kills bacteria, viruses, mold, fungi, allergens	2 Bulbs Replace every 13,000 hours or 2-3 years	
<b>CinQuartz® Substrate PCO Filter: DM900-0450</b> Removes Volatile Organic Compounds (VOC's)	Replace every 13,000 hours or 2-3 years	
<b>Carbon/ Potassium Permanganate Final Filter: DM900-0810</b> Removes VOC's and light gases	Replace every 1-2 years	
<b>Complete 2-3 Year Maintenance Kit: DM900-1003</b> Contains 1 HEPA Filter, 4 Carbon Prefilters, 2 UVC Lamps, 1 Photo Catalytic Oxidation (PCO) Filter, 2 Carbon/ Potassium Permanganate Final Filters, gloves	Replace every 2-3 years	
<b>Cabinet Dimensions: H x W x D</b>	29.5 x 16.25 x 12.75 in	74.9 x 41.3 x 32.4 cm
<b>Input Voltage</b>	120 v 60 hz	
<b>Power Consumption</b>	200 watts	
<b>Power Cord</b>	10.0 ft	3.05 m
<b>Unit Weight</b>	47 lbs	21.3 kg

### HOW IT WORKS

The air passes through a pleated Carbon Prefilter which removes lint and large particles to extend the life of the HEPA filter.

Smaller particles then pass through a long-life, 99.97% HEPA (High Efficiency Particulate Air) Media Filter which captures particles 0.3 micron (1/84,000 of an inch) and larger.

The clean air passes through a reflection chamber where two Ultraviolet Germicidal Lamps emit powerful UVC light rays which are designed to kill or inhibit bacteria, viruses, mold, fungus and microbial growth. These are non-ozone producing lamps. The Ultraviolet Lights are also used to activate the unique CinQuartz Media located below the UVC lamps.

The Photo Catalytic Oxidation (PCO) Filter is a Quartz media coated with nanoparticles of Titanium Dioxide (TiO<sub>2</sub>). The combined action of the UVC light and the TiO<sub>2</sub> decomposes organic materials into basic molecules such as H<sub>2</sub>O and CO<sub>2</sub> and reduces odors and VOC's as a result. The filter is self-cleaning and also destroys the DNA of viruses, bacteria, mold, etc.

A Carbon/ Potassium Permanganate Final Filter further reduces VOC's and light gases.
