Totaline	P101-12		P101-16	
York				EF1200*
	<p>These two filters fit the same units. These units had a "baffle" in the back of the EAC cabinet that acted as a spacer, filling a void 1-15/16" deep. If the baffle is still in place, use the short version 203-00-CA2020S; if the baffle has been removed or if you are unsure (the baffle can be removed if need be), use the long version 203-00-CA2020L.</p>			<p>16" x 20" EAC models marked with * may have either older U-channel or newer flat top collection cells - the 203-00-EA1620U media filter fits only the older u-channel models (see over for a flat-top solution).</p>

Models in red are electronic air cleaners.
