

Electrostatic Prefilters for Electronic Air Cleaners

CREATE THE ULTIMATE PERFORMANCE IN HOME AIR CLEANING

The electronic air cleaner you've installed in your ventilation system is a highly effective particulate air filtration system, specifically designed to remove small particles from the air. However, many of the most common allergens (mold, pollen, pet dander, lint, and household dust) are fairly large particles averaging 10 microns and up in size. As larger particles build up on the metal collection plates, the air cleaner rapidly loses its efficiency and must be frequently cleaned to maintain peak performance. In addition, larger particle deposits can break off and be blown through the air cleaner instead of being captured by the unit, or can cause high voltage arcing which produces a snapping sound in your ductwork.

Initial static pressure with Metal Mesh prefilter 0.07 in w.g.
 Initial static pressure with Permatron prefilter 0.09 in w.g.
 *Results based on independent laboratory testing.

Independent testing shows that using a higher efficiency, washable, electrostatic prefilter will significantly enhance the working efficiency of your electronic air cleaner, without affecting the air flow requirements. In addition, your air cleaner is able to perform more effectively for longer periods before needing cleaning.

Evolution Air Electrostatic Prefilter

- ⚡ Removes larger particles to increase the working efficiency of your air cleaner
- ⚡ Permanent, washable
- ⚡ Reduces "snapping" or arcing
- ⚡ Reduces maintenance requirements and protects your investment

Simply remove your existing electronic air cleaner prefilter(s) and slide in your new Evolution Air Permatron electrostatic prefilter.

Remove the electrostatic prefilter monthly and rinse it with water. Mild detergent will remove any grease. Lightly shake off excess water and return to system. Air flow will completely dry the filter.

Lifetime Warranty

We take pride in the quality and workmanship of our products. All are built to give years of trouble-free service. Any filter found to be defective in workmanship or materials, when returned shipping charges prepaid, will be repaired or replaced without charge. The warranty period begins from the date of purchase and does not cover damage caused by excessive heat, disassembly, rough handling, or improper installation. **DO NOT** take unit apart for cleaning. With proper care and regular cleaning your filter should last many years.
